

Date	Name	Title
26.10.2021		
02.11.2021	Esthela Gonzalez	Does biochar amendment help close the nutrient cycles in tree plantations in the Ecuadorian Amazon region?
09.11.2021		
16.11.2021		
23.11.2021	Pablo Alvarez	Sources of dissolved organic matter in a tropical montane forest in South Ecuador
30.11.2021	Student research project	Various topics from our research.
07.12.2021		
14.12.2021	Nuria Bastediós	Mg stable isotope compositions of soils along a 127-year glacial retreat chronosequence
	<b>*** Christmas holidays ***</b>	
11.01.2022	Svenja Stock	Dissolved P fluxes in Central European beech forests.
18.01.2022	Aiaz Ismagilov	Fractionation of the stable isotope ratios of Mg by soil-plant transfer
25.01.2022	Stefan Merseburger	Hydrogen isotopes in soil clay fractions: Fractionation matters!
01.02.2022	José Ledesma	The role of riparian zones in shaping catchment hydrology and biogeochemistry across four European ecoregions
08.02.2022	Andre Velescu	Response of element budgets to nutrient additions in a tropical montane forest in South Ecuador
	Tobias Fabian	Nitrogen mineralization along an elevational gradient in a tropical forest ecosystem in South Ecuador
